The positive growth I have seen in myself as a professional is undeniable. I have become increasingly more responsible, as well as self-sufficient. I try my best to lead by example, carefully choosing my actions and words, and practice what I preach. There is a quote that I came across that states, “The grass isn’t always greener on the other side; but it’s always green where you water it.” Applied to my life, I believe that in order to truly happy and successful in something I’m pursuing, I need to devote a part of effectively educating and lovingly caring for young children is what I was put on this earth for, and this Early Childhood Development program has confirmed that belief for me.

The education that I have received from this program has altered my early childhood practice by giving me the ability to understand children on a deeper level than most other people can. me to educate other people, including parents, on topics such as developmental stages and what experiences children need to get from one stage to another, proper nutrition and physical activity, and effective disciplinary actions. Although I am still going through the trial and error stage of what seems to work verses what proves to be ineffective, I
still possess that basic foundation of knowledge that helps me in making logical decisions.

After completing my coordinated internship at Staples Mill Road Baptist Church Child Development Center, they kindly asked me if I would be interested in continuing to work in that classroom, but as a full-time head teacher, while one of my previous supervising teachers is out for knee replacement surgery. I gladly accepted the offer. **PLEASE INCLUDE EXAMPLE FROM YOUR CENTER/FAMILY CHILD CARE HOME.** with the parents of the children and work on trying to extend structure and consistency into the homes of these children. pertaining to the lesson can also be introduced to the children to enhance motor skills and ingenuity.
